SUMMARY

Computer Engineer with a Bachelor's degree in Computer Engineering from Istanbul Gedik University (2026) and over three years of professional experience in the software industry. Worked as a Front-End Developer for a Turkish-American software company for one year and four months, contributing to the development of two large-scale web and mobile applications using Next.js, React Native, React, TypeScript, and Tailwind CSS. Previously worked for two years as a Student Admission System Administrator, managing and supporting the student application and enrollment system for international students applying to Turkish universities.

PROFESSIONAL EXPERIENCE

Work3 Teknoloji A.Ş. (Turkey) / Crea Cubed Inc. (USA), *Front-End Developer* August 2024 – December 2025
Developed and maintained the front-end of a large-scale hotel booking platform using Next.js, React, TypeScript, and Tailwind CSS. Designed and implemented responsive, user-friendly interfaces with a strong focus on usability, performance, and attention to detail. Collaborated with cross-functional teams in an Agile development environment to deliver new features and improve existing functionality. Contributed to back-end development tasks using Node.js when required. Participated in the development of a large-scale football mobile application using React Native.

I.S.A Educational Services, *Student Admission System Administrator* 2022 – 2024
Managed the student admission system for applications to Turkish universities. Processed and monitored student applications, ensuring accurate documentation and timely submission. Successfully handled admission procedures for dozens of international students throughout the application process. Coordinated with universities and maintained effective professional relationships to support admission and enrollment procedures. Built and maintained strong professional relationships with the admissions offices of several partner universities, facilitating effective communication and efficient application processing.

EDUCATION

Bachelor of Computer Engineering, *Istanbul Gedik University* 2022–2023 – 2025–2026 | istanbul

SKILLS

Programming Languages
Python, TypeScript, C++, HTML5, CSS3

Backend
Python, SQL, REST API , Asp.net core API

Frontend
React.js, Next.js, React Native,Nuxt.js, Tailwind CSS

AI & Machine Learning
Retrieval-Augmented Generation (RAG), LangChain, FAISS, OpenAI API, Vector Embeddings.

Tools & Platforms
Git, GitHub, Visual Studio Code, Android Studio, Postman.

LANGUAGES

Arabic
native

English
B2

Turkish
fluent

CERTIFICATES

- Operating Systems Basics — Cisco Networking Academy
- Linux Essentials — Cisco Networking Academy (in collaboration with NDG
- Junior Cybersecurity Analyst Career Path — Cisco Networking Academy
- CCNA: Introduction to Networks
- Introduction to Cybersecurity — Cisco Networking Academy
- Ethical Hacker
- Introduction to Data Science — Cisco Networking Academy
- CCNA: Switching, Routing, and Wireless Essentials

PROJECTS

DocuAssist — AI-Powered University Regulations Assistant, *Developed a full-stack AI-powered assistant designed for Turkish universities, enabling students and academic staff to search for university regulations, policies, and guidelines using natural language. The system retrieves accurate answers exclusively from official university documents through a Retrieval-Augmented Generation (RAG) architecture. Built both the frontend and backend using Python, FastAPI, Next.js, and Tailwind CSS. The project received preliminary funding approval from my academic supervisor and TÜBİTAK (The Scientific and Technological Research Council of Türkiye).*

Hotel Booking Platform, *Contributed to the frontend development of a large-scale hotel booking platform ,designed and implemented responsive, user-friendly interfaces using Next.js and Tailwind CSS, while managing application state to ensure a smooth and efficient user experience.*

Football Management Application, *Worked on the frontend of a football-related mobile application, enhancing existing screens, implementing UI improvements, and performing testing using React Native.*

Dalini, Dalini is a bilingual local services and places discovery platform designed for users in Iraq. It enables users to discover categorized businesses, explore detailed profiles, save favorite places, and book appointments through a modern, responsive interface.
Built with Nuxt.js, Vue.js, TypeScript, Tailwind CSS, and Nuxt i18n, the project follows a modular, reusable component architecture with dynamic routing and RTL/LTR language support.

Corporate Travel & Tourism Website
A modern corporate website developed for ARDH DUBAI Travel & Tourism, presenting the company's profile, services, and destinations through a responsive web experience using Next.js and Tailwind CSS

Freelance & Academic Web Projects, *Developed several small-scale web applications throughout my university studies, including projects delivered to clients. Designed clean, responsive user interfaces using Next.js and Tailwind CSS, focusing on usability, performance, and modern web development practices.*
